SRI LANKA

Dilina Jayalath

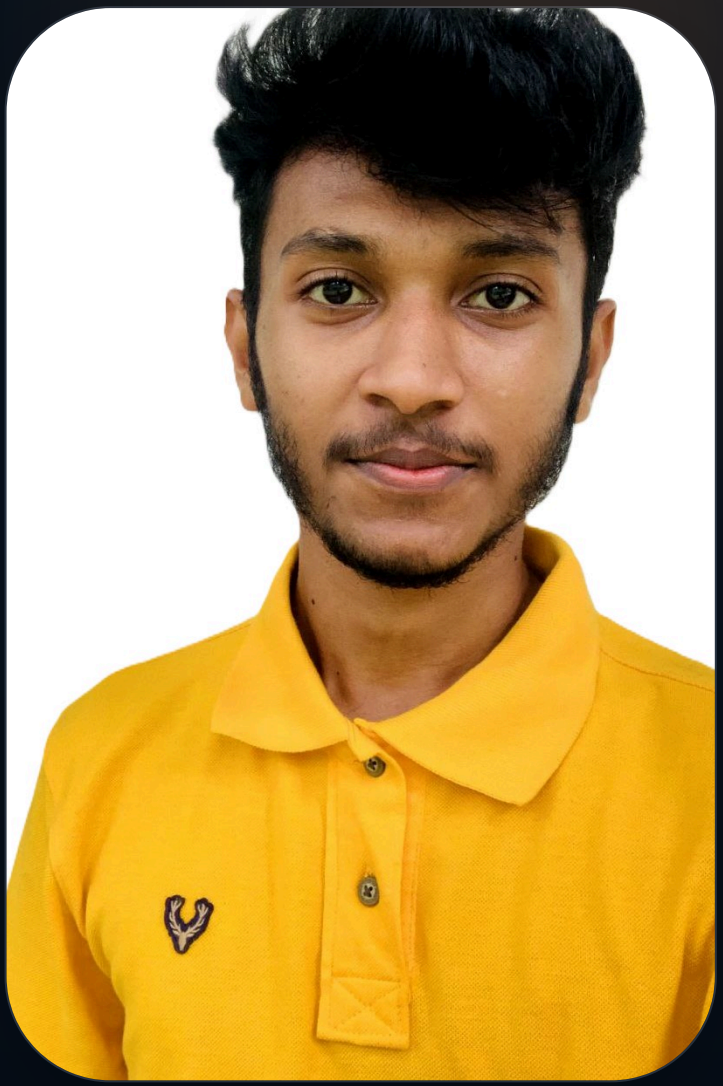
Software Engineering Undergraduate

Academic and Career Portfolio

Software engineering undergraduate focused on practical web development, AI-supported problem solving, and professional growth.

React | Java | Python | Full Stack

Portfolio web site



ABOUT ME

Curious, practical, and career focused.

I am a Software Engineering undergraduate at SLIIT with a strong interest in turning ideas into useful digital products. My work combines clear interface design, structured implementation, and practical value for users. My academic projects and internship experience have helped me grow in React, Java, JavaScript, Python, Kotlin, and database-backed application development.

1. Professional identity

I am a software engineering undergraduate who enjoys building practical digital products and improving how they are experienced by real users. My interests sit at the intersection of frontend development, full-stack implementation, and AI-supported problem solving.

2. Working style

I work best when a task requires both structure and adaptability: understanding requirements, organizing the solution clearly, and refining the final output until it feels dependable and polished.

3. What I bring

My academic work, self-learning, and one-year Software Engineering internship at Irusri Group have given me confidence with React, Java, JavaScript, Python, Kotlin, and databases. I also bring persistence, willingness to learn quickly, and a strong sense of responsibility for the quality of my work.

SKILLS

Technical toolkit.

React.js	88%
JavaScript	86%
Java	82%
Python	80%
Node.js	76%
SQL	74%
Kotlin	70%
MongoDB	68%

Technical development

Advanced React and modern frontend architecture
Backend design with Java, Node.js, and databases
Problem solving, testing, and deployment discipline

Professional development

Interview preparation and confidence under pressure
Professional writing, presentations, and teamwork communication
Portfolio, GitHub, and LinkedIn consistency

Personal development

Time management and prioritization
Lifelong learning through short courses and certifications
Resilience, accountability, and growth mindset

EXPERIENCE

Industry exposure and delivery practice.

1

Software Engineering Intern

Irusri Group
Completed a one-year internship in software engineering, gaining hands-on exposure to professional development practices, teamwork, and real-world product delivery.

PROJECTS

Selected academic and practical work.

MARKETPLACE | 2026 | TYPESCRIPT

Artisan Frontend

React and TypeScript marketplace frontend for artisan discovery, seller dashboards, cart flows, and polished responsive commerce UX.

React 18 · TypeScript · Tailwind CSS · TanStack Query

- Seller dashboard
- Product discovery
- Cart and checkout

ROBOTICS | 2025 | PYTHON

Turtlebot Simulation DQN

ROS 2 and Gazebo setup for TurtleBot maze navigation with DQN training loops, simulator tooling, and autonomous pathfinding experiments.

Python · ROS 2 · Gazebo · DQN

- Autonomous navigation
- Reinforcement learning
- Simulation tooling

AI SEARCH | 2024 | PYTHON

GenAI SQL Search

Natural-language database search workflow that connects a JavaScript frontend and backend with a LangChain-powered Python service.

React · Node.js · Python · LangChain

- Natural language queries
- Service orchestration
- Google AI integration

DOCUMENT AI | 2024 | PYTHON

Chat With Your Document

PDF question-answering app that lets users upload documents and chat with the content through a Streamlit interface.

Python · Streamlit · LangChain · Gemini

- Document Q&A
- Streamlit interface
- Embeddings workflow

FRONTEND APP | 2025 | JAVASCRIPT

Book Store

Book discovery interface built around the Google Books API with browsing, search, and reader-friendly product detail flows.

React · JavaScript · REST APIs · Google Books API

- API-powered search
- Catalog browsing
- Clean UI flow

RETAIL WEB APP | 2025 | JAVASCRIPT

Phone Shop

JavaScript web application for a mobile phone shop, focused on product presentation, storefront structure, and retail-style flows.

JavaScript · Frontend UI · Commerce Layouts · Product Catalog

- Retail presentation
- Product catalog
- Shopping experience

MERN | 2024

Student Management MERN

CRUD-based student management system covering structured forms, record handling, and admin-facing workflows.

MERN

- Coursework evidence
- GitHub repository
- Practical implementation

JAVA | 2026

CTSE Lab 6 Microservices

Microservices lab work focused on distributed service structure and service-to-service integration patterns.

Java

- Coursework evidence
- GitHub repository
- Practical implementation

KOTLIN | 2024

Uni Flipper App

Mobile concept app built in Kotlin, adding Android product thinking to the portfolio alongside web work.

Kotlin

- Coursework evidence
- GitHub repository
- Practical implementation

CERTIFICATIONS & EDUCATION

Credentials and learning milestones.

Education

BSc (Hons) in Information Technology specializing in Software Engineering

Sri Lanka Institute of Information Technology (SLIIT)
CGPA: 3.38 / 4.0 as stated in the current CV

Certifications

Introduction to Cybersecurity - Cisco
Cybersecurity Essentials - Cisco
Python for Beginners - University of Moratuwa

CERTIFICATE

Python for Beginners

Open Learning Platform, University of Moratuwa

26 August 2022

Python fundamentals, problem solving, scripting, and implementation practice.

Supports my academic and portfolio work by strengthening the programming base I use for automation, backend logic, and AI-oriented experiments.

Evidence file attached in portfolio source.

CERTIFICATE

Cybersecurity Essentials

Cisco Networking Academy

26 March 2022

Core security awareness, threat concepts, confidentiality, integrity, availability, and defensive thinking.

Complements my software engineering work by reminding me to consider risk, data handling, and secure practices while building applications.

Evidence file attached in portfolio source.

CERTIFICATE

Introduction to Cybersecurity

Cisco Networking Academy

2022

Introductory cybersecurity concepts, online safety, common attack types, and digital responsibility.

Shows early self-learning beyond programming and connects to my goal of becoming a dependable full-stack engineer.

Evidence file attached in portfolio source.

REFLECTIVE JOURNAL

Academic reflection.

Preparing for Professional World helped me connect academic work, employability, and professional identity. The reflections below show how I moved from simply completing tasks toward building evidence, communicating progress, and planning realistic career development.

PPW taught me that employability is broader than technical skill

Before studying Preparing for Professional World, I mostly measured progress by coding ability and completed projects. The module made me recognize that employers also look at communication, professionalism, initiative, time management, and the ability to present work clearly. That shift helped me see career preparation as a continuous process rather than something to think about only when applying for jobs.

Because of this, I now pay more attention to how I explain my ideas, document my work, and present myself through my CV, GitHub profile, and professional conversations.

I learned how reflection improves professional growth

A major value of PPW was learning to examine my strengths and gaps honestly. Reflecting on my learning habits showed me that I am comfortable with implementation, but I need to keep improving interview confidence, networking, and the way I communicate achievements without underselling them. Reflection turned those weaknesses into action points instead of vague concerns.

This made me more intentional about setting goals, tracking progress, and linking each academic activity to the professional capability it develops.

Professional communication is a skill I must keep practicing

PPW reinforced that technical knowledge has limited value if it cannot be shared effectively. Writing CV content, organizing evidence, preparing career plans, and thinking about workplace expectations showed me that clarity, respect, and confidence are essential in team environments. Good communication supports collaboration, trust, and better outcomes.

As a result, I want to keep strengthening presentation skills, interview responses, email etiquette, and the habit of tailoring communication to different audiences.

Career planning works best when it is specific and realistic

The module also helped me connect long-term ambition with immediate action. Instead of having a general idea about becoming a software engineer, I now think in stages: strengthen technical depth, gain industry exposure, improve professional presence, and build evidence that demonstrates growth. This makes my career development plan more practical and measurable.

I now approach my future with clearer priorities: graduate strongly, secure meaningful experience, and continue building a portfolio that reflects both skill and professional maturity.

CAREER PLAN

Roadmap toward professional growth.

1

NEXT 12 MONTHS

Graduate readiness

Complete my academic work strongly while maintaining or improving my performance.
Strengthen React, Java, Python, database, and problem-solving ability through consistent project work.
Use my completed one-year internship experience as proof of readiness while preparing for entry-level software engineering opportunities with a sharper CV, portfolio, and interview practice routine.

2

1 TO 3 YEARS

Early-career growth

Work in a software engineering role where I can contribute to production-level features and learn from stronger engineering processes.
Deepen knowledge in frontend architecture, backend integration, APIs, testing, and deployment workflows.
Build confidence in professional communication, teamwork, code review, and responsibility within real delivery environments.

3

3 TO 5 YEARS

Specialization and impact

Develop into a full-stack engineer who can take ownership of larger features from planning to deployment.
Specialize further in product-focused web development while continuing to explore AI-enabled applications.
Contribute ideas more confidently, mentor where possible, and build software that solves meaningful user problems.

C V

Profile summary.

Curriculum Vitae

Motivated Software Engineering undergraduate with a solid academic base and growing practical experience in web development, Java, React, Python, and Kotlin, including a completed one-year Software Engineering internship at Irusri Group. I enjoy building useful applications, learning quickly, and contributing to teams with discipline, adaptability, and curiosity.

- BSc (Hons) IT undergraduate specializing in Software Engineering at SLIIT.
- Completed a one-year Software Engineering internship at Irusri Group.
- Builds practical projects across React, TypeScript, JavaScript, Java, Python, Kotlin, SQL, and MongoDB.
- Public GitHub portfolio includes marketplace, AI search, document AI, robotics, mobile, and management system work.

Software Engineering Undergraduate

1 Year Internship Experience

React, Java, Python, Kotlin

Full-stack Web Development

Dilina Jayalath

Software Engineer Undergraduate

ABOUT ME

I am an undergraduate student who likes to learn new things and gain new experiences with technology. I am creative and like to dedicate myself to working hard and achieving a goal. I want to work with experts in the field and gain valuable experience and knowledge while also completing my internship.

PERSONAL ATTRIBUTES

- Adaptability and Multitasking
- Good thinking and creative ability
- Ability to adapt and operate under pressure
- problem-solving under achievements

Education Qualification

- **SLIIT-Malabe | Oct 2022-Present** (CGPA : 3.41)
  BSc (Hons) in IT (Specialized in Software Engineering) – Sri Lanka Institute of Information Technology
- **Certification**
  - Introduction to Cybersecurity – *CISCO (2023)*
  - Cybersecurity Essentials - *CISCO (2023)*
  - Python for Beginners – *University of Moratuwa (2022)*

Technical Skills

- **Programming Languages :** C,C#, Java, JavaScript, Python, Kotlin
- **WebDevelopment skills :** HTML, CSS, React, Node.js
- **Mobile Development skills :** React Native, Android Studio
- **Frameworks & Tools :** MERN Stack, Bootstrap, Firebase, Git
- **Database Skills :** MySql, SQL Server, MongoDB

Projects

- **Smart Healthcare System for Urban Hospitals (Medcare)**
  - **Technologies -** MongoBD, Express, React JS, Node JS, Tailwind
  - **Contribution -** Developed backend, designed web UI, and implemented appointment management for a hospital app.

  Website - https://nocturn-medcare.netlify.app
- **Handymen Mobile App (Fixer)**
  - **Technologies -** MongoDB, React Native, Firebase, Express
  - **Contribution -** Implemented map views and user management features for a home services app.
- **Online Land Selling System (Lanka Lands)**
  - **Technologies and Tools -** PHP, HTML, CSS, JavaScript
  - **Contribution -** Designed and implemented the home page, land listings, and user management system for the web application.

  Website - https://dspjayalath.000webhostapp.com
- **Stock Management System | Web Application**
  - **Technologies and Tools -** HTML, CSS, JavaScript, Java (JSP Servlet), Apache Tomcat, Eclipse IDE
  - **Contribution -** Developed both frontend and backend features to streamline stock management processes.
- **Generative AI Application | PDF Handler**
  - **Technologies and Tools -** Python, Huggingface, Node.js, virtualenv
  - **Contribution -** Developed a full-stack application with frontend and backend.
